

Position to Position Relationship - Create

PO13

Change History

Update the following table as necessary when this document is changed:

| Date | Name | Change Description |
|------------|----------------|--------------------|
| 12/28 | Farrell | Script standards |
| 12/30/2005 | Chylynn Hansel | Edits |

Purpose

Use this procedure to create a supervisory relationship between two positions.

Trigger

Perform this procedure when a relationship must be established between two positions.

Prerequisites

Both position objects must exist.

Menu Path

- Human Resources → Organizational Management → Expert Mode → Position

Transaction Code

PO13

Helpful Hints

The Organizational Management Processor will use this procedure to create the position to position relationship outside of the Create Position action if needed.

Procedure

1. You have started the transaction using the menu path or transaction code.

Maintain Position

2. As required, complete/review the following fields:

| Field Name | R/O/C | Description |
|------------|-------|---|
| Position | R | This is a specific and concrete description of the responsibilities that one individual fulfills in an organization. Each employee in HRMS is assigned to a position, which contains information about where the employee fits in the organization. Example: 60000251 |
